

GeoTek Alaska, Inc.

Driller

Job Description: Alaskan Environmental/Geotechnical Drilling company is currently looking for applicants with previous drilling experience for the upcoming season. We use Geoprobe drill rigs to perform a wide variety of environmental and geotechnical services for our clients. This ranges from direct push techniques to air rotary/down hole hammer operations, some rock coring, groundwater monitoring well installation, and other auger methods. Experience with Geoprobe 6610/6620, 8040, and 7822 machines, or 8150LS Sonic machine is desirable.

Documentation skills, problem solving (including mechanical, hydraulic, and electrical diagnostics), ability to professionally interact with clients, and the ability to adapt to changing situations is a must. Ability to lift 50 lb routinely. In addition to your skillset, you must have a current driver's license, pass a pre-employment physical/drug test, and ability to pass a background check (necessary for access to Military installations). CDL is a plus but not necessary. Able to drive forklift/skid steer also handy.

Out-of-state applicants are encouraged to apply. Come work for a leading environmental/geotechnical drilling company that serves all of Alaska. Frequent extensive travel is required as we roll into the upcoming season (lots of overtime). We **DO NOT** operate on a set routine work schedule (i.e two-week rotations) but is dependent on the scope of work for the project. We will provide additional training (on the job or otherwise), as necessary. Please email your resume to resume@geotekalaska.com.

Benefits Include

401K/matching

Health Insurance/Vision Insurance

Paid Time Off/Sick Time Off

Prefer Local Alaskans to apply. No relocation provided from out of state applicants.
